Karan Shete

Senior Backend Engineer

Zurich, Switzerland | shetekaran50@gmail.com | linkedin.com/in/karan-shete-311966140 | github.com/karan-sss | karan-s.com

SUMMARY

Backend engineer with 7+ years building Java and Spring Boot systems for enterprise clients. Since 2024 on-site in Zurich with an enterprise client, building the APIs behind a multi-tenant customer portal and modernising legacy integrations. Best Performer award four times at TCS. I also run my own production platform end to end.

EXPERIENCE

Tata Consultancy Services (TCS)

Developer Lead, on-site | Zurich, Switzerland | 2024 – present

- Built parallel API orchestration across several downstream services for one tenant of a multi-tenant customer portal, working directly with client stakeholders.
- Protected it with Resilience4j timeouts, retries and circuit breakers and Redis/Caffeine caching; load-tested with Locust and moved the service to horizontal scaling.
- Developed services replacing a legacy IBM MQ integration with Kafka, PostgreSQL and Elasticsearch phonetic search, including a daily Apache Camel job over around 50 million records.
- Moved service authentication from mTLS to OIDC with JWT. Best Performer award, 2024.

Senior Developer | Pune, India | 2023 – 2024
Software Developer | Pune, India | 2019 – 2022

- Built a multi-tenant ITSM product (ServiceNow-style): incident, problem, change and major-incident tickets orchestrated in Camunda BPMN, with approvals, change windows and CI management.
- Migrated its frontend from AngularJS 1.6 to Angular 14.
- Built a test execution platform running load, UI (Selenium) and API suites from a central script store.
- Best Performer awards, 2020, 2021 and 2022.

PROJECTS

Self-hosted production platform (open source) | github.com/karan-sss/project-infra
Runs karan-s.com for about €7 a month: Terraform, Cloudflare, VPN-only admin, signed and scanned images, CI cost guard, encrypted backups with a monthly restore drill, 14 ADRs.

SKILLS

- **Backend:** Java, Spring Boot, Hibernate, Apache Camel, Camunda BPMN, Resilience4j, Node.js, Python
- **Messaging and data:** Kafka, IBM MQ, RabbitMQ, PostgreSQL, MS SQL, MongoDB, Redis, Elasticsearch
- **Platform:** Kubernetes, OpenShift, Docker, AWS, Google Cloud, Terraform, Jenkins, GitHub Actions
- **Testing and security:** JMeter, Locust, Selenium, OIDC / OAuth 2.0, JWT, mTLS

EDUCATION

Bachelor of Engineering, Pune University | 2018
